I'm a videographer and video editor with over two years of experience creating content for events, corporate shoots, and live news. I specialize in shooting, editing, and delivering polished videos using Adobe Premiere Pro.

I've worked with KDR TV Production, Jacobo Multimedia, and UNTV-News and Rescue — handling everything from short films and cooking shows to real-time live broadcasts.

I'm confident working both behind the camera and in post-production, and I enjoy turning raw footage into powerful visual stories.

I'd love to bring my skills and creativity to your team. You can view my resume and portfolio for more details. Thank you for considering my application.

Best Regards

julmar Sanico
